- Jira
- Photoshop
- Illustrator

WORK EXPERIENCE

- **Breakthrough Media** / FEB 2016 - JUN 2016
  Contract Front End Developer: I worked as contract developer in Breakthrough Media on a variety of projects including charities, NGO's and some government projects. The websites were done using WordPress and a custom theme from scratch. I was responsible for writing both backend (PHP) and frontend (HTML, CSS & JS) code for these projects

- **TMP Worldwide UK** / NOV 2014 - FEB 2016
  Front End Developer: As a front-end developer my role at TMP was to transform the flat design done by the digital designer into a fully functional, interactive website.

  Key responsibilties & Skills:
  - Writing HTML, CSS & Javascript
  - Custom NPM build tool from scratch
  - Umbraco & WordPress
  - Working closely with Digital Designers, UX designers and other developers

- **AUTOLOGICA SYSTEMS LTD** / MAR 2013 - OCT 2014
  UX & Web Developer: Autologica Systems LTD is a company specializing in providing online solutions for minicab companies. They have a range of products including online booking system, cab company websites and fleet management software (Unicorn 2).
  My roles at Autologica involved creating wireframes and designs for both websites and desktop software using Balsamiq and Photoshop. I was also involved in creating flat templates for websites which later on backend integrated with the booking system.
  In addtion I was involved with creating HTML Emails & Banner for clients.

- **MILI.LONDON** / MAR 2011 - Present
  Freelance Designer & Developer: Alongside with my full time roles I've been freelancing as web designer for more than 5 years. I've helped numerous startup and established businesses to improve their branding and online presence.
  As a freelance web designer I am both responsible for design and development of the websites. All of the websites are created using WordPress as content management system and themes are created from scratch to insure maximum control and performance.
  Process includes the initial mockup based on the content. Then I start design process with a mobile first approach. From there a small and large layout design is created using adobe photoshop.
  I then create a pattern library and write the HTML, SCSS and JS as separate modules. These modules are then combined in the write order to generate a template.

EDUCATION

- **BACHELOR OF MUSIC** / 2009 - 2012
  Royal Holloway University of London.

- **DIPLOMA IN IT AND TECHNOLOGY** / 2006 - 2008
